

integrated Translational Health Research Institute of Virginia

INTERESTED IN RESEARCH?

iTHRIV is a collaborative NIH-NCATS funded clinical and translational research institute (UL1 TR003015 & KL2 TR003016). iTHRIV provides **resources, services, training and funding** for health-related research teams at any stage of their careers across all Schools of UVA with 3 broad goals:

- use **data** to improve health
- **grow the next generation** of clinical and translational researchers
- enable diverse **teams, including community partners**, to solve pressing health problems

The iTHRIV research concierge service connects investigators to resources that support all aspects of clinical and translational health research. This service helps researchers conduct *feasibility assessments, work towards a successful research proposal, plan for study conduct, address barriers during study execution, and effectively disseminate the health research results.*

Resources and Services

- Informatics and Data Science Tools
- Biostatistics Support
- Training Resources
- Finding Collaborators
- Pilot Funding
- Feasibility Assessments
- Community and Stakeholder Engagement
- Proposal Development Support
- Regulatory Issues
- Research Ethics Consultation
- Trial Innovation Unit
- Understanding Budget and Billing
- Research Management Systems
- Publication Resources
